## WORK EXPERIENCE

---

### PROSO.AI

Senior Software Engineer

Noida, UP

June 2023 – Present

- Owned backend design and implementation of a DocuSign-integrated **contract management system**, automating inter-company contract creation and digital signing, reducing manual effort by **70%** and cutting onboarding time by **~50%**.
- Designed and built a **billing and invoicing engine** to calculate payouts and charges, handle tax components, manage escrow fund allocation and generate invoices for fixed-fee and time-based projects, processing **₹80L+ in annual transactions**.
- Built **reporting and analytics dashboards** for projects, payments and invoices, enabling finance and ops teams to track utilization, payouts and revenue in near real time and reducing manual reconciliation effort by **~30%**.
- Built internal **admin tooling integrated with Salesforce CRM**, improving operational data access speed by **40%** and reducing manual ops effort by **50%**.
- Mentored junior backend engineers and performed design and code reviews while owning critical backend systems.

Software Engineer

January 2022 – June 2023

- **Led backend development** for **Workwall**, building services to onboard existing clients and enable company-wide project management through a B2B work marketplace, supporting the first production release with **10+ companies**.
- Designed and developed a **project management module** with milestone-based tasks and timesheets enabling structured delivery for fixed-fee and time-based projects and reducing manual project tracking by **60%**.
- Built a **secure payments infrastructure** integrating **Stripe** for international payments supporting wallets, in-app credits and email-based payment triggers processing **\$30K USD** in early B2B transactions.
- Integrated third-party services such as **SendGrid** for transactional emails and **Affinda** for intelligent document processing, improving notification reliability and reducing manual document review time by **~50%**.
- Contributed to REST API design and database modeling, improving **backend maintainability** and reducing production issues during early feature rollouts.

## TECHNICAL SKILLS

---

**Programming Languages:** Javascript, TypeScript, C++

**Backend & Architecture:** Node.js, Express.js, Microservices, Serverless, Event-Driven Architecture

**Databases:** MySQL, Redis, PostgreSQL, AWS QLDB

**Cloud & Tools:** GCP, AWS, Firebase, Git, Linux

**Others:** Salesforce, Stripe, SendGrid, Docusign, Affinda

## EDUCATION

---

MANAV RACHNA UNIVERSITY

B. Tech in Computer Science & Engineering

Faridabad, HR

May 2019

## PROJECTS

---

CompressTXT

- Built a CLI-based **lossless text compression system** in C++, implementing custom encoding and decoding logic to achieve up to **55% reduction** in text size.
